Evidences of Stalwartism in the New Cabinet-Jos Wheeler's Appearance in the Capital No. Sec. hoeler's Appearance in the Capital-Mr. Ste-phens's New Book-Around Among the Politicians-Washington Gossip.

### In and Around the Capitol.

TON, December 11.-- [Special Correspond ence Constitution.] -An eminent southern statesman, whose name I do not feel at liberty to give was talking the other day of the political outlook and was talking the other day of the political outlook and especially of the present administration. He said:
"We all see now what a firm stalwart Mr. Auther is, and how determined he is to misadministration on that line. But I believe he is a man of good sense, who will associate a safe cabinet with him and conduct the affairs of his high office in a business-like way."

sense, who will associate a safe cabinet with him and conduct the affairs of his high office in a business-like way.

"What do you think of his alleged interference with the election for speaker?"

"It was really the first decisive act of his administration, and showed him to be a shrewd politician. Kasson was Blaine's choice, but developed no strength worth speaking of. Hiscock represented the anti-stalwart element. Keifer was the man because he was not anti-stalwart, and will answer some valuable purposes."

Sach views are frequently expressed of late. Of the decided partisan character to be assumed by the administration there is not the least doubt. However, there appears to be a growing confidence in the new president. A practical and a clean administration is generally expected by Now Arthur is assured of a fair, unprejudiced trial these whom I have heard speak of its prospects. Now Arthur is assured of a fair, unprejudiced trial the fore congress and the country. It is necessary the camera of the country, it is spoken of in Washington as remarkable for its prastical suggestions and its want of slune.

markable for its practical suggestions and its want of slush.

The financial views enunciated in it will, of course, meet firm opposition even in his own party. The silver dollar and the silver certificate will never be given up without a struggle. One of the lingering fears concerning Arthur is that he leans toward the great monopolies. His financial views, it may be safely predicted, will result in nothing definite during the present congress.

Mr. Stephens said to-day: "I am reading Colonel Avery's 'History of Georgia,' and find it very interesting. Senator Brown is the hero of the book, for his public life is closely interwoven with the period of Georgia's history it covers."

"How is your book progressing "' I asked.

The book referred to is a "History of the United States." Mr. Stephens's School History" is already largely used. This new work is to be a comprehensive effort of several hundred pages. Upon it the author has expended great labor and research. On the question of secession, the work will perhaps be especially explicit, and some conflict betwern Mr. Stephens and Mr. Davis may naturally be expects have been diving after the original meaning of the Indian names whose pretty rythmic sound is heard in all parts of the state. Mr. W. O. Tuggle has associated a great deal with Indians recently, and from them has learned that many of these pretended interpretations are incorrect. For instance, it has been said that Chattahoochee means "red paint." But the truth is the Creek Indians called the river "charto (rock) hatchee" (figured, indie...ting a river on whose overchanging rocks they had graven the curious devices of their worship or the rude hieroglybhics of their alphabet. The mistake in the derivation was natural for the Creeks have a word "chartee" meaning red and "hutchee" liver. But these combined do not they owned its banks, "Charto-hotehee-hutchee," or the rock-figured river.

Many of their explanations of these layers of these layers and of these layers day are interesting. In some of these

of their oxplanations of their explanations of the original meaning of words we now use carelessly every day are interesting. In some of these words there are embalmed the leggends, and too often, the sorrows of a people. When they realized that they were slowly surely being driven from the land of their fathers they sometimes gave to its hills and rivers tender names of love. The pathos of "Alabama" has, I suppose, suggested itself to every one who knows the history of that state and the meaning of the word. It shrines the last hope of the ked man.

Mr. Leg claims to be the author of the "Hideal application of the ward st. "a he swore at the Guiteau trial. This hous, a claimed for several persons, but the undispated credit should be allowed to Blaine. If he is really the father of that euphonious term it is very probable that before 18s4 we shall see him dancing to his own music.

Yesterday afternoon in the lobby of the Metropolitan hotel I saw a small man with a profusion of white felt hat and grayish beard approach a tall, finely proportioned gentleman who was leaning over the counter of a news stand, reading.

"How are you, general" said the little man.

"I don't believe, you know me." These words had bardly escaped the lips of the little man whe other other other other of the other of some other of the other exclaimed.

had bardly escaped the lips of the little man when the other exclaimed:

"My dod, doe, I am glad to see you!"

They almost embraced then and seemed thoroughly happy.

The Mtde man was General Joe Wheeler, and the big mat, was senator "Cerro Gordo" Williams, of Kentucky. They had fought size by side, but had not seen each other since the dark days of war.

General Wheeler says he has a very strong case and is confident of keeping his seat.

One of the favorite dissipations of our esteemed Vice President Davis is riding. He always drives himself in a low rockaway to which is appended a fat family-looking horse. Usually the V. P. has a friend with him, ande. Usually the V. P. has a friend with him, ande. Usually the V. P. has a friend with him, ande. Usually the V. P. has a friend with him, and so he rolls up the smooth avenue chats with evident pleasure. They say he is soon to have a better companion by his side than any man could be.

The fight over the Griffin post-office has ended, as I telegraphed you in the appointment of Mr. Thurman, a republican and a lawyer. There was no objection to Mr. Logan, and he was indorsed very strongly, but Frank Hatton holds the reins at the department now.

A republican said yesterday: "Hatton is the first lam was no have had in the children of the first lam was not a second or the control of the cont

department now.

A republican said yesterday: "Hatton is the first man we have had in that place for years. He has the grit to stick to his party." He was right. Hatton is a stalwart after or rain's own heart, and succe he went into power seems to have ridden rough shod over James. He is said to have announced his intention of playing havoe in the south generally. A democrate postmaster's head is now held on by very slight tenue.

Hatton is having more fun here than he does with Burdette in Burlington.

No comprehensive resolution on the subject will be submitted to the senate, but the various changes will be made from time to time separately. The caucus also this morning adopted a resolution providing for the creation of a senate committee on the rights of women.

As to the Cabinet.

Washington, December 12.—The president has to-day sent to the senate the nomination of Frederick T. Frelinghuysen to be secretary of state crick T. Frelinghuysen to be secretary of state.

The Star says: 'It is known that Secretary Hunt will not retire from the cabinet for at least a month or more. It is not known, however, whether he will remain or not. It can be stated definitely, how ever, that the current statement that he will go back to the court of claims has no foundation what ever. He will not again become a member of that court. When Judge Woods was promoted to the supreme court, the United States circuit judgeship which was made vacant thereby was tendered to Secretary Hunt by President Hayes. Both Mr. Hayes and Secretary Evarts urged Secretary Hunt to take it, but he refused. The circuit judgeship was a much better place than a seat on the court of claims bench, which the present secretary of the navy then held. The reason why Secretary Hunt did not accept it was because he had reason to expect that he would be a member of President Gardiel Secretary.

Washington, December 12.—Secretary Blaine to day made public letters of instruction sent to ou ministers at Peru and Chili last summer. The letministers at Peru and Chili last summer. The letters are both dated, "Washington June 15, 1881," to
General Huribut, at Lima. Secretary Blaine says
that if Mr. Huribut found a willingness on the part

ally attracting more attention. A lively fight ove this this winter can be foreseen. The free trader will oppose the bill for the tarit, commission; the will oppose the bill for the tarial commission; they say it is only a trick of the protectionists; that the commission will be composed of protectionists, and, instead of recommending tariff revision, will go still further toward the protection extremists ground; they will fight the measure extremists ground; they will fight the measure reduction. It is evident, however, that the commission bill will pass. The sentiment of both mission bill will pass. The sentiment of both houses favor it. It is estimated that 165 members of the house will vote for it. This question promises to divide the democrats considerably, and while a few republicans may go with the free traders party discipline will hold them nearly all in line. Protection is growing fronger in the republican party; they believe it is taking more hold on the country, and that it particularly opens an opportunity for republican ascendency in the south, where manufacturing establishments are increasing. The western democrats are outspoken for free trade. Sparks, of Illinois, said to night that the farmers of the west-are nearly all free traders, and that next year they will only vote for free-trade candidates for congress. He believes Illinois can be carried for the democrats on the issue of a tariff for revenue only. The vote in the recent democratic caucus to table a free-trade resolution did not represent the sentiment of those present; it was a shot at Randall, intended to beat him for the nomination for speaker.

A majority of the present democratic members of the house are all apparently in favor of a tariff for revenue, and will so vote when the question comes up. it is only a trick of the protectionists; that the

Of late years he has been very cautious as to inve preferring the cash to anything that was the least bit doubtful.

preferring the cash to anything that was the least bit doubtful.

It is said that he cleared just about one hundred thousand dollars in the sale of his interest in the East Tennessee and Virginia road, and about the same amount in the sale of his interest in the Spartanburg road. We learn that he has about one hundred thousand dollars in city real estate. He was a strong believer in the future of good farming lands in Georgia and Alabama, and invested largely in them. He owns a very large plantation in Campbell county that is said to be one of the very best in the state, and he has other lands scattered throughout Georgia and the surrounding states. He has about fifty thousand dollars of the stock of the Atlanta national bank, which is considerably above par, a large amount of bonds and stocks and an unusually large amount of cash. A gentleman who is in position to know says that just prior to his death he had considerably over one hundred thousand dollars in cash and stated that he did not know in what to invest it.

His will has not yet been made known, but it is presumed that the property will be divided between the four children and his widow. He leaves a soon, Mr. W. W. Austell, about twenty eight years of age, another son, Alfred Austell, about six years of age.

On their return the party will visit Frankfort and escort the legislature of Kentucky to Atlanta, reaching here at noon Sunday.

# The Clarke Seed Cotton Cleaner.

The past week has brought more farmers to the tion exposition than perhaps all the other week

The past week has brought more fairness of the cotton exposition than perhaps all the other weeks put together.

The best cotton planters in the south have been here and they have spent the week in carefully considering the various machines intended for the better cultivation and handling of cotton. In squads of a half dozen or so, usually under the leadership of some intelligent expert they have made practical tests of almost every implement or machine within the grounds.

A CONSTICTION man has been with the planters in their peregrinations the whole week, and it is but justice to say that no one piece of machinery has attracted such universal attention or won such unqualified praise as the Clarke cotton seed cleaner. We are especially proud of this as the Clarke seed cotton cleaner is an Atlanta Institution, manufactured right here, and in the hands of our Atlanta company. Mr. Edward Atkinson pronounced it the most important piece of machinery developed by the exposition, and this opinion was echoed by week.

The Clarke seed cotton cleaner is made in this week.

the thousands of planters here during the past week.

The Clarke seed cotton cleaner is made in this city and managed by a company of our most prominent and reliable citizens. Mr. J. W. Goldsmith and Mr. R. J. Lowry, both men of the brightest character and credit, are president and treasurer respectively, with Mr. C. D. Meador, one of our most prominent and popular young business men, is secretary. Mr. George H. Bradley, a young gentleman of fortune and ability, came from New York to take an interest in this cleaner and become superintendent of the company. He has gone to the front rat k in our business and social circles, and his character adds to the guarantee of his associate that nothing but a worthy article could be sold under their indorsement.

The orders for the Clarke cotton seed cleaners—have been so heavy for the past week that the facilities for manufacturing next year must be more than trebled to meet the demand. No farmer should fail to see the Clarke seed cotton cleaner.

### Credit to Whom Credit is Due

EDITORS CONSTITUTION: It is truethat great credit is due the president, the director general and the whole executive committee for the grand success of the exposition. But there is one man, modest and unpretending who has had but little said about him during the unparalleled success of this display, which has been the admiration of the ters of thousands who have visited from day to day this display of art and mechanism—that man is samuel M. Inman, whose name should be embalmed in the memory of every Georgian. But for him and his noble generosities, no doubt but that the exposition might have been a failure. In the midst of the most terrible financial straifs, and when everything looked dark and uncertain, then it was that this noble man came to the rescue and advanced thousands of dollars out of his own pocket and placed the exposition on the high road to success. Well done good and faithful servant. Come up higher.

### The Mexican Exposition

The Mexican Exposition.

Vesterday a number of exhibitors held a meeting in the Press pavilion, at which they discussed a proposition to visit the exposition at Orizaba, Mexica, and make displays there. The matter was finally postponed to be more fully discussed at a meeting to be held at the Exposition hotel to-night. About seventy-five exhibitors express a deterination to go to the Orizaba exposition at the close of the one now being held at Oglethorpe park.

# SAVED FROM A HORRIBLE DEATH

QUINCY, ILLINOIS, November 1, 1881. Two years ago I contracted the horrible disease, and up to May last had spent \$500 for treatment by the best medical men without any benefit, on the contrary, I grew worse. My mouth and throat becoming badly ulcerated, sores breaking out on my neck and legs. It also suffered excruciatingly with Kheumatism, growing very despondent, and my best friends advised me that the icy hand of death was fast approaching, and indeed I felt such to be the case. This was my condition in May last. I caught at S. S like a drowning man at a straw. After taking two bottles I could feel a great change for the better. The ores began to discharge freely and the Rheumatism to abate. When I had taken six bottles every sore had healed, my skin began to assumed a natural appearance. I persisted in the use of S.S.S. until I had taken twelve bottle AND THERE IS NOT A SYMPTOM OF THE DISEASE REMAINING, and I feel as well as I ever did. I have gained 21 pounds in flesh and my friends wonder at my improved condition. have recommended it to many and in every instance with complete success. I believe that S. S. S. have saved me from a horrible death, and wish I could induce every sufferer to do as I have done-take S. S. C. H. SMILEY.

If you wish we will take your case, TO BE PAID FOR WHEN CURED. Write for particulars and

CHRISTMAS approaches, and the turkey

THE cabinet of the late president seems to be very retiring. A HORSE-DOCTOR testified to Guiteau's insani-

ty on yesterday. OUR Washington correspondent is struggling with the derivation of Indian names.

POSTMASTER-GENERAL JAMES also declares himself "out." His formal resignation has

been forwarded to the president. It is given out that the repudiationists of Virginia have reached an agreement by which Mr. Riddleberger will succeed Senator

The governor of Kansas is endeavoring to enforce the prohibitory law, but he finds it up-hill work. Drinking Kansas is as tough a problem as was bleeding Kansas.

THE official vote in the late Virginia elec tion, reported to the general assembly, gives the readjusted republicans an average majori ty of a fraction under 12,000.

THE death of E. B. Mack, the well-known correspondent, makes the third inroad in : short time upon the prominent journalists of the country. The first was Shelton Mackenzie, the second J. W. Forney, and the third

THE legislature of South Carolina will visit the exposition on the 20th. The Kentucky legislature will be here on the same day This will give the followers of Calhoun and the disciples of Clay a chance to sip old Bourbon together.

THE secretary of state has made public the instructions sent Ministers Hurlbut and Kilpatrick, in relation to the disturbed condi tion of affairs in South America. There i nothing in the matter to bring censure on the state department; but the fact remains that the diplomats to whom these letters were addressed were more interested in their private jobs than they were in the honor of the gov ernment they were supposed to represent Civil service reform is nowhere more imperatively demanded than in the foreign service

THE determination of Mr. Bookwalter to es tablish a branch of his business in this city is much more important than it seems at first sight. It gives emphasis to the fact that Atlanta is becoming one of the great manufact turing centers of the union, and Mr. Book walter is but one of many who are consider ing the establishment of business here. There is now active inquiry in every line of business made for the purpose of comparison and Atlanta, and let us say the whole south, is full of admirable business opportunities. And behind this there is a population rapidly growing in wealth, who are ready sumers of everything that enters into the comfort or necessities of civilized life. In the meantime Atlanta extends welcome to Mr. Bookwalter.

# THE VIENNA TRAGEDY.

The cable continues to be freighted with details of the terrible calamity in the Vienna play house, in which over nine hundred persons are known to have perished, besides the maimed, and the distress that will fall upon the dependants of many of the victims.

This great disaster renews interest in a subject which has been frequently discussed and as frequently dropped from the public attention-the insecurity of our public buildings. There hardly passes a week in which evi dence is not furnished to the fact that the architectural plans of the day are but deathtraps, slowly accomplishing their work of de struction, but seriously considered only when some overwhelming calamity, such as the present, makes the whole world shudder. Arches and galleries and ante-rooms and fancy ornamentations are all studied in the designs for new buildings, while one of the leading requirements is almost wholly neglected-the means of getting out. Our archi tects seem to forget that it is often more im portant to get out of a building than it is to

THE great need of all architecture is a means of exit. Goethe once made a plan of such a theatre, which was rejected on the ground of the costliness of executing it. Goethe con soled himself by saying: "A new theatre is "in the end, only a new funeral pile which 'some accident will, sooner or later, set on 'fire." The difficulties of rendering a theatre fire-proof are practically insuperable. It seems, therefore, that the attempt of architects of theatres ought to be in the direction of a slow-burning construction, with abund ant exits and with broad and easy staircases It is doubtful whether the law ought not to provide that every theatre shall have its longest side open to a street or an alley. The safety of the audience is of much more consequence than beauty of architecture.

# THE NEW SECRETARY OF STATE.

On yesterday the president sent in to the senate the name of Frederick T. Frelinghuysen, of New Jersey, for secretary of state, and the nomination was immediately confirmed by that body.

The new secretary is a man of great ability and of the highest social standing. He has twice represented his state in the senate of the United States, in which body he always held the confidence and esteem of both parties, although he was what might be termed

clined. His administration of the state departnent will not be as acceptable to the people as was that of Mr. Blaine, for while he possess nore culture than the late secretary he has not the popular manners nor the practical knowledge of men that makes Mr. Blaine so necessful.

The Frelinghuysen family, like the Admses of Massachusetts and the Bayards of Delaware, are hereditary office holders. The grandfather of the new secretary, Frederick Frelinghuysen, was born in New Jersey in 1753; served as an officer in the revolutionary war; was a member of the continental congress of 1775; and served two terms in the federal senate. Theodore, the secretary's father, and a son of the foregoing, was born in 1787; also served two terms in the senate; and was nominated for the vice-presidency on the whig ticket with Henry Clay in 1844, but was defeated: and in his declining years paid a great deal of attention to matters of education. Out of one hundred years of existence New Jersey has been represented in the senate by Frelinghuysens thirty-six.

Mr. Blaine, it is said, intends to enter into ective business life, and will be heard of here after in the railroad developments of the day careless of the fortunes of politicians or the freaks ef politics. Those who claim to know better, however, insist that the wily ex-secretary's retirement from politics is not substantial, and that as 1884 approaches. he will be heard of more and more as one of the leaders of the contest. But, whatever changes may be in the future, it must be admitted that Mr. Blaine has made an able foreign secretary, and has found his way into the popular heart by means that stamp him as a lion leader of men.

In fixing up things, the stalwarts found it neces sary to reject Garfield's chaplain simply because he had been Garfield's chaplain. This is by no means the least of Grant's victories.

In searching around for a Georgia Mahone, the administration is blind if it does not at once settle upon the right man. Need we point with pride?

Your Uncle David Davis, having turned loos the top rail of the fence, and definitely straddled the republican mule, is now of the opinion that the mule has a long and prosperous career before

THE Hon. Montgomery Blair is out in anothe card demanding the nomination of Mr. Tilden, in 1884. This probably destroys our Uncle Samuel's

MR. THOMAS MURPHY struggles to the surface in sight of an office. General Grant never forgets any of his political troops.

CONGRESSMAN SAM Cox is full of both humor and usiness. It is probable that Congressman Cox would have been president by this time but for the diabolical influence of John Kelly.

GUITEAU says he would rather be hanged as a ensible man than acquitted as a fool. We are in vor of just such a verdict as this. Let Guiteau be hanged as a sensible man. Far be it from us to

It is not to be denied that the panic workers nean business. They have already succeeded in dictating the most important portions of Secre tary Folger's report.

RIDDLEBERGER will have a walk over. Wise ha too few syllables in his name

GEORGE GORHAM will have to be admitted to the union as a state, in spite of the opposition of the New York ribune. When Riddleberger is elected, Gorham will have two representatives in the Senate and no state has any more than this.

WE know how much it costs to get in a theater, out how much does it cost to get out? This is a very important problem.

THE organs are already engaged in explaining why the president failed to politely abuse the south in his message. Probably one of the main reasons is that Grant is afraid of Blaine.

THE statement that an Ohio editor lost \$1,000 in a New York gambling house should be received with extreme caution. In the first place, where did the editor earn this amount of money? In the second place, isn't it true that he had gone on to New York to buy out two or three of the metropolitan papers and consolidate them?

THE Valdosta Times wants to know whether th democratic party is fighting for principles or spoil. This is a very cunning question. We are of the pinion, however, judging by the compromise that have been made in the platforms of the party since 1870, that our leaders have had one eye of the flesh-pots. Somehow, we do not regard this a a very sad fact. On the contrary, it is natural and inevitable.

It is announced that Colonel Albert Lamar is to be editor-in-chief of the Macon Telegraph, unde its new auspices. This is a very good thing for the Telegraph. Colonel Lamar is a journalist of large e, and has no superior as an editoria writer. He has no narrow views, and he will bring to the discussion of public questions a scholarly mind, a judicial temperament and a thorough with all phases of politics. Moreover he will invest the Telegraph with that charm o ndividuality which accompanies originality. welcome Colonel Lamar to his own again, and take pleasure in filing his name with a list of our mos steemed contemporaries.

The latest attempt against the czar, the failure of which has been already announced, was of a complicated and fantastic character. The plan was to send up a kind of balloon loaded with dynamite and fire balls, and fitted with appliances by means of which it could be directed in its course and caused to fall within the palace yard at factoria. As it fell it was to explode and set the palace on fire, and in the consequent confusion the car and other members of the imperial family were to be seized. The machinery captured by the police shows that everything was in readiness for the execution of the plot, which was revealed through the rashness of a young member of the secret league. As usual, it is intimated that several persons of high rank were concerned in the conspiracy; and, as usual, it is not impossible that the whole story had its origin in some imaginative mind or in the occult purposes of the police.

Some southern editors see brilliant possibilities in a presidential ticket for 1884 of Blaine and Brown—James G., of Maine, and the pushing Georgia railroad man and senator. in business or politics, are made up of a series of compromises. "
Mr. Blaine is putting money into southern business enterprises, talks cordially of making a tour of the south, and the newspapers of that section warm toward him with a loving kindness that is quite blind to the past. which abjured Grantism and all its works at Chicago.

It is well to observe also that Senator Joseph E. Brown is a great polltical force in Georgia and outside of it, and that his local newspaper admirers are many. He is an industrious and successful manager, whose boast has been that he never yet failed to carry a point on which his heart was set. For some time past the Georgia newspapers have been attacking two democrats of national reputation, Thomas Bayard and Samuel J. Randall. To build up Brown it seems to be thought necessary to tear others down. This fact has been remarked upon by the astute Charleston News and Courier.

A DISTINGUISHED PARTY. Philadelphia Passes Through the City on Wheels A party of gentlemen, headed by Mr. James Creighton, general freight agent of the Pennsylva nia road, reached Atlanta yesterday in Mr. Creighton's special car. They are superbly housed in their home on wheels. They have with them an excellent cook, a larder stocked bountifully, elegant sleeping apartments, and the hospital is jointly occupied by Mr. Fred Loveloy and Mr. B. K. Jamison. The party consists of Mr. Creighton, one of the leading managers of the Pennsylvania road, and one of the best railroad men in America. He is a courteous gentleman and a good companion. Mr. Martin, the treasurer of the city of Philadelphia, and a man of high character and repute. Mr. Fred Lovejoy, the manager of the Adams express company of Philadelphia and superintendent of three cityisions, known and beloved by all men. Mr. B. K. Jamison, a banker of Philadelphia, a director of the Evans Pacific railroad and a leading friend ia road, reached Atlanta yesterday in Mr. Creighdivisions, known and beloved by all men. Mr. B. K. Jamison, a bunker of Philadelphia, a director of the Texas Pacific railroad and a leading friend of Mr. Gould in his various enterprises, and was probably closer to President Tom Scott during his lifetime than any other man. Mr. Fuller, who, in copartnership with Mr. Martin, owns the principal abottoirs of Philadelphia, Baltimore and New York, and are the largest cattle commission merchants in the country. Mr. Nead, an accomplished gentleman and heavy railroad director, who has made bolh character and fortune and done his part in the development of the north and is now looking to a heavy investment in southern acricultural lands. Mr. Rutter is a financier and direction of New York, a commissioner of the American institute fair and director in the Farmers' loan and trust company and several other banking institutions, and Mr. Thresh, known to all lovers of good things in America as the best restauratean this side of Delmonico.

These gentlemen took in the exposition yesterday, in company with Colonel John Flynn, Mr. Kimball, Mr. Wrenn and Mr. West, who is a brother-in-law of Colonel Butler, and other gentlemen. They were more than pleased with what they saw, and readily gave our exposition next rank to the centennial. These gentlemen live in their special car, enjoying the quiet seclusion that the side track grants. They have held several receptions and given one or two dinners, but to day they will be in the hands of their friends in Atlanta, signalizing the close of the day with a dinner at the residence of Director General-Kimball.

# THE ORDINARY DOG

And the Blooded Dog, Not Quite So Ordinary.

To-day is dog day at the exposition. This feature a new one in Atlanta, though bench shows have nade the dog quite popular in many northern ities, where a kind of esthetic craze has developed cities, where a kind of esthetic craze has developed in regard to that animal. It seems to be admitted that St. Louis has within her limits more gentlemen addicted to the sports of the field, gentlemen of eminence in all the walks of life, and more and finer dogs of the sporting class than any city on the continent. More dogs and better, let it be understood, representing a value that actually exceeds that of blooded horseflesh, strictly speaking. St. Louis supports four very prosperous organizations—the /St. Louis Kennel elub, the St. Louis Gun club, the Dardenne hunting club and the St. Louis sportsman's club. In the raints of these clubs are the leading commercial and professional men of the

man's citib. In the rathes of these citibs are the leading commercial and professional men of the city. The clubs are all rich and exclusive in the matter of membership. The former has the bett kennel of pointers in the world. At the head of the list is "Faust," whose pedierce runs back for a sentury; value \$5,000. Nine other dogs in the kentel are worth \$700.

century; value \$3,000. Nine other dogs in the kennel are worth \$700.

At the Missouri kennel there was a beautiful fexterrier, a shaggy little Scotch terrier, with a keen eye and cruel mouth, a diminutive black-and-tan which weighed but three pounds, and is even then considered too fat, a comical-looking but intelligent Cocher spaniel, and several hunting dogs with kind eyes and noble heads. Mr. Kaye called attention to the fact that he is probably the undeniable owner of more blooded hunting dogs than any other person in the United States. In proof of this he showed upwards of fifty beautiful, thoroughly trained and broken animals, which obeyed his every command. Among the animals owned by Mr. Kaye, and which attracted the reporter's attention, were a pair of beautifully marked lemon and white pointers, Young Sensation and Rose, by Sensation, out of Orgill's Champion Rose, which led at Westminster. This brace cannot be purchased for \$1,300. Charles, owned by J. B. Lucas, is worth \$2,000; \$1,000 have been refused for C. E. Bicher's pair of red Irish setters; E. Harrison's brace of pointers cost \$500, and at least a hundred persons could be named who paid from \$100 to \$1,000 for their pets.

It is stated on good authority that Colonel Albert R Lamar, of Georgia, who, during the Forty-sixth congress, was tally clerk of the house of representatives, will be tendered the position of editor. The paper sold for \$22,000. Colonel Harrison, who owns a large interest in the Telegraphand Messenger, was a member of the recent tariff convention held at New York, and is known to be infavor of a protective tariff, and it is stated that the paper would be hostile to the railroad commission of Georgia.

### THE BROAD WILL

An Important and Somewhat Sensational Post-Mortem on a Will.

The court of ordinary, Judge Cathoun presiding, was busily engaged yesterday in the Broad will case. On Saturday, it will be remembered, persons were examined as to the authenticity of the will. The witnesses to the document and parties acquaint d with Mr. Broad's signature deposed, and then the case was continued until yesterday, when it was resumed by the introduction of Prof. B. F. Moore, of Moore's business college, who was put upon the stand as an expert. Professor Moore was shown the will, and a number of cheeks which were known to have been signed by Mr. Broad, and asked to compare the signatures. He examined the signatures carefully and leisurely, and then said that he did not think the signatures, and then said that he did not think the signatures to the will a genuine one because it was unlike the signatures to the checks known to have been signed by Mr. Broad. In the mame signed to the will he thought the "J" had a peculiar formation in the upper stroke, connecting it with the "o" from its bottom curve. The "h," too, was defective, being somewhat lower than in the signatures known to be his. The last stroke on the letter "n" was much lighter than that in the other signatures. The "B" was unlike any "B" made by Mr. Broad with a single exception, and the other letters in the sir name were equally uncertain. Then, too, it appeared as if the signature to the will and been written without removing the pen from the paper, when Mr. Broad wrote without this connection. His conclusion was that Mr. Broad did not sign the will.

He was then asked to examine the signature of Wm. Gray attached to the will and to compare it with signatures known to be Mr. Gray attached to the will and to compare it with signatures known to be Mr. Gray attached to the will and the handwriting of notes to Mr. Cummings offe. Ing to reproduce the will for \$500.

The case was then continued until 10 o'clock Monday next. An Important and Somewhat Sensational Post-Mortem on a Will.

The union passenger depot was illuminated with ten electric lights last night. For several days past Mr. B. B. Nostrand, Jr., of New York, who is agent for the United States electric lighting company, has been arranging this plant, and Saturday night the electricity was for the first time turned on. The machine used is known as a dynamo-electric machine, and the electricity is generated by finduction. In the center of the machine there is a large revolving cylindrical body called the armature. This is made of an iron frame wound with insulated copper wire, and revolves eight hundred and fifty times per minute. In its revolutions it passes between the positive and negative poles and generates the electricity, which passes to the commutator, which is made of sixteen segments of copper, and then by wires to the line wire until it reaches the globes. The plant cost about \$2.200, and by it the car-shed is made almost as bright as day. Each globe gives a light equal to about \$2.200, and

AMUSEMENTS.

JESSE SHEPARD.—This gentleman, who is regarded by many as a musical prodigy, can be seen and heard at Liberal hall to-morrow evening.

HESS ACME OFERA COMPANY—Crowned with success in New Orleans, Clucinnati, in fact, all the cit-les visited by them this season—will begin an engagement at DeGive's opera house Thursday night, loth. Mr. Hess has a "Mascotte," and it is bringing the best of "good luck" to him.

ing the best of "good luck" to him.

Joseffy.—In writing a notice of the concert of this distinguished musician, we are not hedged about by platitudes and imperative indefiniteness or elegant non-committal verbiage, for the rendition of a programme full of gems was such as to command commendation in positive terms and in unqualified applause by the large and intelligent andience at DeGive's open house hast night. A number of the pieces gave play to Joseffy's strength and perfect planissino. Schoman's "Tracumerel" was embodied in beautiful sound. The spinning song "danced weirdly along under the pianists' delicate touches." And the "Mill" is an exquisite piece of music painting, with its delicate foncies of ripping water and the swash of the wheel. No fault could be found with Joseffy's pains taking execution. Whether the composion was strong or tender, passionate, or simply tuneful, he portrayed its meaning with a charm. His delicacy of touch enabled him to give the lightest shades as well as the boldest strokes of musical expression. The elever touch of his adagios; the crispness of his staccatopassages; the streaming richness of the sostenuto; his softness, elasticity, delicacy and tender shading must be heard to be appreciated. We have not space to speak of the highly acceptable rendition of several songs by Miss Laura Bellini. Her voice has evidently been well cultiwated, and makes up in power what defect there perhaps may be in sympathy.

Many who read this notice this morning are doubtless still nursing the sweet effects of the music glory which fell upon them last evening, and bright and beautiful will be to them the memories which link themselves with the Joseffy concert.

ories which link themselves with the Joseffy concert.

Comey-Barton.—This excellent company, with its chorus of seventy-five voices, will play Olivette at DeGive's opera house to-night. In speaking of the company's rendition of Olivette in Chicago, an exchange from that city says: The company is an excellent one and in excellent working order, no waits, no hitches, no ugly gaps in the raise en scene, no halting in the dialogue. The ladies and gentlemen who play second to the names starred upon the bills are themselves superior to nine out of ten of the so styled leaders of many traveling combinations. The scenery is beautifully painted, and the optical, electrical, chromatic, and mechanical effects are managed with absolute perfection.

The costumes are of uniform elegance and the back row ballet girl boasts quite as fine a satia or as rich a lace as the leading lady when such adornment is called for.

That artistic harmony of color, both in the individual costume and in the "keeping" of groups, which adds so much to optical satisfaction, is never forgotten, while the young laddes of the chorus and ballet have evidently been chosen by the dual tests of physical beauty and artistic efficiency.

There was not a moment's sense of weariness throughout the performance, gem of song foliowed gem. sparks of wit or humor scintilated all the time, and the dances were of the most rollicking yet proper order. The grand dance of all the characters in the second act barely escaped a fourth repetition, so enthusiastic was the demand.

Misc Catherine Lewis deserves all that has been said in her praise. She is decidedly the liveliest opera bouffe artist upon the American stage to-day. Pettite and pretty, plump as a partridge, and pretty as a picture, her form the embodiment of feminine grace, all her movements show the poetry of motion, while her face is constantly full of expression, and whether she smiles or pouts she is equally pleasing.

## A BIG RAILROAD SCHEME.

Fred Wolffe Gathering up the Missing Links. ELMA, Ala., December 12.-An important meet ng of prominent railroad men was held in this city to-day. It was the occasion of the incorporation of the Cincinnati, Selma and Mobile railroad company. Fred Wolffe, the financial manager of the Erlanger syndicate, who recently bought the Selma and Greensboro railroad, was met by the following gendemen from Cincinnati: Theo Cook, president of the Cincinnati. New Orleans and Texas Pacific; George F. Doughty, secretary; Edgar M. Johnson, attorney, and Louis Krohh and Thomas T. Gaff, directors. These gentlemen incorporated the Cincinnati, Selma and Mobile company and elected Fred Wolffe, president. Theodore Cook, vice-president, Maximilliam Calm, secretary and treasurer, and George F. The journal of the last session was read and approved.

Mr. G. P. A. Spyers was granted leave of absence for six months on account of sickness.

The station house keepers' report showed that during the month 95 state cases had been entered, and 57 of these had been prosecuted while 38 were released for want of pro cention. It also showed that the county was indebted to the city \$11.85 for meals furnished state pi-oners.

The following report of the police work for the past month was read by Chief Congolly.

Poince Headquarters, Altanya, Ga., November 30, 1881.—Honormide board of police commissioners —tientlemen: I have the honor to submit the following report of the operations of this department for the month of November, 1881:

State cases, 85: city, 502; total, 597; which were disposed of as follows: State cases prosecuted, 57; state cases released, 38; total, 95; city cases fined, 355; city cases dismissed, 135; city cases continued, 12; total 502.

The amount of fines imposed by the recorder for

12; total 502.

The amount of fines imposed by the recorder for the month is \$2,220 50, of which amount there was collected \$1,466 40; remitted by his honor the mayor, \$72 lost by escapes, 18,50; worked and being worked out on the streets, \$663,60; total, \$2,220 50.

The amount of money collected and paid to and receipted for by the city clerk is on account of fines, \$1,416; station-house fees and impounded stock, \$50.40, making for the month a total of \$1,466.

fines, \$1,416; station-house fees and impounded stock, \$0.40, making for the month a total of \$1.466.40.

The city, as to the sanitary condition, is better than at the time of making my last report. The sanitary officers continue to do faithful duty in keeping the city clean. I have the officers and men to report all dangerous holes in the streets and sidewalks, so that it will facilitate the city engineer in looking after same.

The station house has been kept as neat and clean as circumstances would permit. I am having some repairs done which has been needed for a long while, which will make the cells more safe in guarding against escapes in the future. I would recommend that an iron cage be made for prisoners in extreme class, for often it is difficult to commit prisoners to jull—for instance, when crimes are committed at late hours of night.

The police force during the month have maintimed the reputation that they have always borne, in discharging their duty, they have been courteous to strangers and have made themselves generally useful in giving directions and look after their wants. Captain Aldridge, and Officers Stroud. Crim and Starnes have been detailed to look after and protect strangers on the arrival and departure of trains, at the carshed, and on the exposition trafus between the grounds and the city. I am satisfied that they have done much in preventing erimes in many instances. All of which is respectfully submitted.

Miss Annie C. Hornady has severed her connection with the Thomaston high school and returned to Atlanta. This will be gratifying intelligence to her many admiring friends in the city.

Mr. R. R. Stallings, conductor on the Western and Atlantic railroad, yesterday returned from New Orleans, where he has been attending the conductors life association of the United States and Canada. He says he had a royal time.

Mr. Charles D'Alvigny, a planter residing at East Point, yesterday morning sent Carson Campbell, an employee, to Atlanta with a wagon drawn by two mules for a load of lumber. Campbell, according to instructions, should have returned to East Point by I o'clock. At 6 in the evening alarmed came to the city in search of his team and the driver. Chief Connolly, to whom the case was stated, detailed a policeman to aid in the search for the missing property, but up to I o'clock this morning no trace of it had been obtained. Campbell is a young white man of about twenty years of age, and is a native of Fulton county. He has been working for Mr. D'Alvigny only a short while, but is well known in parts of this county for honesty, and although his disappearance is uanccountable, Mr. D'Alvigny does not suspect him of any wrong. One of the mules is of a sandy color, while the other is black. They are both large valuable animals. The wagon is a new thimble skein.

NEW PUBLICATIONS THE BEST PERIODICAL

FOR AMERICAN WOMEN.

### 1882. HARPER'S BAZAR

A REPOSITORY OF

Fashion, Pleasure, and Instruction.

Harper's Bazar is universally acknowledged to be the best periodical for women published in the United States. It is the American authority upon fashions, household affairs, social etiquette, and all other kindred matters, while it occupies a foremost position among journals of literature and art. It has been the aim of the publishers to adapt it to the Miss Sallie Hall and Misses Ella and Mollie Rus-lell, of Columbus, left yesterday evening for Co-gratifying proof of their success is found in the fact gratifying proof of their success is found in the fact that the Bazar is a welcome visitor and a trusted ate, at adviser in the homes of people of all classes and

circumstances throughout the continent. Constant communication with the great capitals of Europe enables the conductors of Harper's Bazar to make immediate announcements of such change make immediate aunouncements of such changes and modifications in styles as take place—in—those centers of fashion. The columns of Harper's Bazar include from week to week clear descriptions and brilliant illustrations of the latest modes; and occasional Supplements, containing distinct and easily followed tracings of desirable patterns, render it practicable for subscribers to cut out and make for themselves elegant suits and garments of the most approved shapes, without assistance or advice from professional dress-makers. This purpose is provided for still more efficiently by means of cut paper patterns of popular styles illustrated in the Bazar, which are sold at prices suitable to the most limited means. In this way Harper's Bazar not only leads the fashion, but enables its readers to dress in the most becoming attire at the smallest possible expense.

to not only leads the fashion, but enables its readers to dress in the most becoming attire at the smallest possible expense.

The arrangements made for the treatment of embroidery and decorative needle-work are unusually complete. The South Kensington Royal School of Art Needle-work, the Vienna and Nuremberg Embroidery Schools, the New York Decorative Art Society, and other similar institutions, are under engagements to furnish working designs to Harper's Bazur for publication—a privilege accorded by the South Kensington School to this journal alone. The readers of the Bazur are thus put in possession of the newest and most select devices in art work of various kinds, wherein so much progress is continually made, both in this country and in Europe.

Novelties in every department of house-keeping are also regularly recorded in the Bazur; and articles on artistic house-furnishing convey to its readers practical information upon that interesting and popular subject.

Trustworthy decisions upon questions of dress, manners, and social customs are given each week in the column entitled "Answers to Correspondents," which, in the varied character of the information it contains, is among the most valuable sections of the paper.

Occasional letters from Paris, London, New York, and other great cities give abar migral presses of

GOOD COFFEE

Everybody wants it, but very few get it. because most people do not know how to select coffee, or it is spoiled in the reasting making. To obviate these difficulties has been our study. Thurber's package Coffees are selected by an expert who understands the art of blending various flavors. They are rousted in the most perfect manner (it is impossible to roast well in small quantities), then put in pound packages (in the bean, not ground,) b aring our signature as a guarantee of genuineness, and each package contains the Thurber recipe for making good Coffee. We pack two kinds, Thurber's "No. 34," strong and pangent, Thurber's "No. 41." mild and rich. One or the other will suit every taste. They have the three great points, good quality, honest quantity, reasonable price. Ask your Grocer for Thurber's roasted Caffee in pound packages, "No. S4" or "No. 41." Do not be put off with any other kind-your own palate

will tell you what is best. Where persons desire it we also furnish the "Ideal" Coffee-pot, the simplest, best and cheapest coffee-pot in existence. Grocers who sell our Coffee keep them. Ask for descriptive circular.

Respectfully, &c H. K. & F. B. THURBER & CO., Importers, Wholesale Grocers and Coffee

Roasters, New York. P. S.-As the largest dealers in food products in the world, we consider it our interest to manufacture only pure and wholesome goods and pack them in a tidy and satisfactory manner. All goods bearing our name are guaranteed to be of superior quality, pure and wholesome, and dealers are authorized to refund the purchase price in any case where customers have cause for dissatisfaction. It is therefore to the interest of both dealers and consumers to use Thurber's brands.

Dalton Argus.

Last Tucsday morning another one of those most unfortunate accidents happened on the Selma, Rome and Dalton railroad, whereby a man lost his life by being run over by the outgoing Selma train. The party killed was named Hagy and his home was in Bristol, Tennessee. From the testimony adduced at the coroner's inquest, it seems that Hagy was walking on the Western and Atlantic milroad track and had got as far as the water-tank, a mile and a half from town, when he heard the State road train coming and he stepped off of that track on to that of the Selma road. While watching the train as it passed him at the rate of thirty miles an hour, the train on the Selma road came up behind him, knocking him several feet in the air, failing under the wheels, mangling and crushing him almost beyond recognition. The coroner summoned a jury, held an inquest and from the testimony given before them we gather these facts. The accident, or whatever it might be called, occurred at the head of the sharp curve this side of the water tank, at a possess where it was impossible to see over thirty yards back. Hed it been in almost any other blace poor Hagy might have saved his life, even though the train was running not less than forty-five miles an hour. While the coroner's jury exculpates the employes from all blame, we cannot but believe had the orders of the railroad officials heen observed, the killing would never had occurred. At the time of the catastrophe, the Seims train was endeavoring to overtike the State road train, after leaving the car shed two or three minutes behind it, and did overtake it about two or three hundred feet beyond the tank, although the latter train was running tarry miles an hour. There is, we understand, an order issued by both roads, prohibiting the racing of trains between this city and the junction, where the two roadsviverge. We do Dalton Argus.

The citizens of Wayeross were alarmed on Friday night last by the ery of murder! Murder! Murder! Quite a number responded to the alarm, and by prompt and persistent efforts a horrible murder was prevented and the would-be murderers captured and safely lodged in jail. The facts as we learn them are briefly as follows: A merchant of the town—Mr. Henry Laventhal, who sleeps in a room adjoining his store—was in the act of retiring for the night, and as his custom before lying down, looked under his bed to see if any person was secreted thereunder. Unexpectedly, however, he discovered lying upon the floor a negro man—loel Thompson. He ordered him from the house, and was intending to let him pass out unmolested, but not until he began to unfasten the door did he discover the real object of the intruder's mission. While in a stooping posture, the negro dealt him a severe blow on the head with a hammer, which was followed by a second and third stroke, inflicting two severe wounds on the neck and forehead, and one upon the arm Mr. Laventhal grappled besthe could, with his antagonist and prevented his inflicting any serious injury until help arrived, when the assassin made his escape through a window and secreted himself under a house near by. He was seen as he escaped from the house and it was observed that he was wearing no coat. Anothen next own seen leaving the scene of action in great haste and was closely pursued—and captured. Search was immediately instituted for the one in his shirt sleeves—and, as before stated, was found secreted under a house near by. They were committed to jail on Monday last to await their trial at the next term of Ware superior court. Kobbery was doubtless their object, and had they succeeded in their intention it is highly probable that the crowning act in the performance would have been to apply the incendiary's torch. A murder was committed in our town, last Tuesday night, by Donam Johnson, colored, on Mary Reynolds, colored. The circumstances as we learn them were about as follows: The parties had been living illicitly as man and wife for some time, both being very abandoned characters, wholly given up to vice. It seems that Mary, like characters of her, kind, had been a little lavish in her affections for another Adonis of ebony hue, whereupon the irate Donam, though himself as licentious as the devil wanted him to be, far exceeding even negro morality in his unrestrained and disso lute habits, took a terrible offense, and commenced on Sunday to openly threaten to take her life. She told others that she was afraid of him and would leave him and return to her home, Valdosta, and had packed her earthly possessions and was at the time of the killing proceeding to the depot to take the train. Donam is said to be a negro of very wicked and bad habits. He should be caught and made to pay the extremest penalty of the law, at the end of a strong rope.

The fire in Camilla which occurred on last new year's night and destroyed the then remaining business thouses, is being traced up. A detective recently visited the town and remained incognito to the inhabitants. Report says he was very sociable indisposition, played billiards with unvarying success, and at all times refused the social glass. He frequently visited the farm houses, and seemed to be a gentleman of ample leisure. To all inquiries as to his business, he always replied that it would be known before he left. We have not learned full particulars, but learn that he had Messts, J. S. Jones & Bro. merchants in Camilla, in whose house the fire originated, arrested, and at the late term of Mitchell superior court the grand jury found a true bill against them. What has been done with these gentlemen, or when they will have a trial, we have not learned. The detective that worked up the case was, we are informed, in the employ of the insurance companies which lost by the fire.

STEALING A BED QUILT.—Officer Gloer yesterday arrested Henry Johnson, who had in his possession a bed quilt belonging to a resident of Pryor street, which was stolen Sunday night. Johnson could mot tell how he acquired the ownership and was locked up to answer the charge of larceny.

MARRIED.—At the station house, yesterday after-moon at 2:30 o'clock, Charles Cunningham was mar-ried to Cenia Walker, by the Rev, Mr. Johnson. The groom is a lad of about 19, years, while his bride has long since passed twice that age. But for the vigitant eyes of Officers Crim and Spear, these two oving hearts would not now beat as one.

STRAYED—Saturday, December 10, a medium sized pointer dog with large liver-colored spots on his right side and head. He had a collar around his neck and a slit in the lower part of one of his ears. Two inches of his tail was cut off, and he answered to the name of Bob. \$10 reward will be paid for his return to 169 Jones street.

LOST BY PICK-POCKETS.—A Mr. Hampton, from Chattanooga, ran into a large crowd at the Whitehall depot yesterday, and when he came out on the other side found that he had been relieved of his watch and chain. Their value was about \$150.

Entrops Constitution—The woman calling her-self Agnes Pitts, who was recently convicted of bar-ceny in the Recorder's court, is not Agnes Pitts, the wife of Munford Pitts, so long head waiter at Bai-lard's restaurant. The latter Agnes Pitts has long been employed in my family, and I know her to be an honest, good woman. Please publish this in justice to Mrs. Pitts.

Burning Breweny — Shortly before I o'clock yes terday the cry of "fro" created quite an exci ement on the streets, and when it became generally amounced that it was the burning of the Atlanta city brewery, on Collins street, the excitement only hereased, and hundreds of pootle rushed in that direction. The fire department, with greater promptness than usual, hurried to the scene, and in a few seconds were playing fively streams upon the flames, which were found to be emanating from a small house adjoining the main buildings, in which the "pitching" is done. The water was convenient, and for the first time in the history of Alanta abundant, and in a few minutes the flames were entirely conquered. The building in which the fire was is a small brick structure about 20x45 feet and is one story high. It is used for making pitch for the beer keys, and was as mear here, proof as could be. The fire originated while the room was unoccupied by any one and is supposed to have been caused by a spark falling into the kettle of pitch which was being made. The timely discovery and prompt and efficient work of the firemen alone swed the company another total destruction of its recerty. The building was insured. The loss is timated at \$500.

orde people lose a good adviser and the whites a sincere friend.

Saturday Night's bire.—The fire Saturday night was not as serious af it might have been, and it was fortunate for the company that it happened when it did, for at any other hour it would have burnt a large number of horses and mules. Yesterday an architect was busy drawing a plan for new stables, that will be as near fire proof as possible. The cars did not run on Sunday, and only a portion yesterday. The drivers were engaged till late at night on Saturday at the fire, and the harness and fixtures of the street cars were it no fix to be used until they could be arranged. It is the purpose of the street car company, we understand, to at once build permanent stables of the most durable kind on the site of the old stables. All day vesterday workmen were busily engaged in removing the debris, and by noon to-day the building of the new stables will have been begun. Their capacity will far exceed the old stables and will be made so as to accommodate the increasing business of the company. The books, papers, etc., were all saved and Mr. Ed. Peters wearing a smiling face, says, "Well, \$4,500 will cover our loss." The building used as a manufactory of 8.8.8. was damaged considerably in the rear but the front was hurt but little. All their machinery was burnt but not wholly destroyed. Their loss is estimated at about \$0.00. The entire roof was cut and burnt away. The next house up Line street was only damaged to a small amount.

The well known druggist of Andalusia, Ill., Mr. Robert Ross, sends us the following: Since I bought the store of Mr. Thompson, deceased, I have introduced the St. Jacobs Oil, and it is remarkable how many thorough cures it has produced. I myself have tried it and in three days I was relieved of the most acute rheumatic pains. Have retailed five dozen of the St. Jacobs Oil in two weeks, and the village is not large.

It is evident that Guiteau's wife never had the last word.—Philadelphia Chronicle-Herald.

Muskrats are late in building their houses this year. Old settlers say this means an open winter.

Why Are You Billi us?

Because you have allowed your bowels to become costive and liver torpid. 'Use Kidney-Wort to produce a free state of the bowels, and it will stimulate the liver to proper action, cleanse the skin of its yellowness, cure bilious headache, and cause new life in the blood. Pruggists have it, both dry and Mquid.—Zion's Herald.

English "hansom cabs" are to be introduced in Philadelphia.

The kidneys are nature's sluice way to wash out the debris of our constantly changing bodies. If they do not work properly the trouble is felt everywhere. Then be wise and as soon as you see signs of disorder get a package of Kidney-Wort and take it faithfully. It will clean the sluice-way of sand, gravel or stone and purify the whole system. Druggists sell it, both liquid and day, and it is equally efficient in either form.—Independent,

PAIN KILLER has been in constant use for forty years, and the universal testimony from all parts of the world is, IT NEVER FAILS. It not only effects a permanent cure, but a relieves pain almost instantaneously. Being a purely vegetable remedy, it is safe in the hands of the most inexperienced.

The record of cures by the use of PAIN KILLER would fill velumes. The following extracts from letters received show what those who have tried it think:

Edgar Cady, Owatonna, Minn., says:

About ayear since my wife became subject
to severe suffering from rheumatism. Our
resort was to the Pain Killen, which speedily
relieved her.

Charles Powell writes from the Sailors'
Home, London:

COTTON COMPRESS

NEW MORSE COTTON COMPRESS. The Largest and Most Powerful Compress on the Earth. With a Lifting Power of 3000 Tons.

THIRTY-FIVE have been built and erected in four years; and for this period twice as many as all other compresses, and in the last two years five times as many as all others combined in the United States, making the investment in the Morse Fress over one million dollars in four years. 400,00 pounds of material are required for a single Compress, and only iron is used of the highest known grade. Their immens weight, strength and durability, make them in the end, the cheapest Compress in use, and the only one to meet the commercial demands of the present and future. Several of those firs built have now compressed from 400,000 to 500,000 bales cotton, without defect or perceptible wear. The have secured a density (measured in the press) of 75 pounds to the cubic foot.

A FEW CHIEF MERITS.

A FEW CHIEF MERITS.

1. It is, in all respects, simplest in construction, and least liable to disorder or breakage.

2. It is a steam power, and works faster than any of the hydraulic presses and has no packings to give out, when delays would be ruinous.

3. It has fewer points in motion, and consequently less wear and friction than any other compress.

4. Its wedge-shaped rack and cycloidal sectors secure a progressive leverage, nicely adjusted to overcome the increasing density of the bale, as the platen is brought home.

5. Its superior power has reduced freight to a minimum, and wherever located, has made the business of compress wonderfully successful, and at many interior points has doubled the receipts of cetton. New Orleans alone has nine of these manmont presses: Memphis, three; Houston, three; Norfolk, three; others at Mobile. Galveston, Brenham, Dallas, Fort Worth, Paris, Jefferson, Shreveport, Little Rock, Vicksburg, Meridian, Columbus, (Miss.) Selma, Wilminton, West Point, Va. The Atlanta Merchants are Coming.

The officers of the Western and Atlantic, or Kennessw route, are said to be meeting with great success in the organization of their excursion for the benefit of southern merchants who wish to visit this city to purchase holiday goods. The fure for this round trip is but \$10, and almost every merchant of Atlanta is said to be coming. The officials of the road have kindly limited the the tickets for five days, starting from Atlanta on the 14th and returning on the 19th, which will give them ample time to see the different business firms here and make the best bargains they can. The merchants of this city are interesting themselves in the forthcoming excursion, and will doubtless go down on the Southern road to meet them and see that they are well cared for during their stay in the city. It was reported last night that the delegation would be remarkably large. The route will be from Atlanta to Chattanooga by the Western and Atlantic, and from Chattanooga by the Western and Atlantic, and from Chattanooga and rexas Pacific.

We clip the foregoing from the Cincinnatt Enquirer. The advertisement will be found in The CONSTITUTION. It will be a grand opportunity for spunders merchants to visit (incinnati, and the rate of \$10 should induce hundreds to go.

An ample number af coaches will be provided to curry any number. The excursion tickets are good only to leave Atlanta at 12 o'clock Thursday night and on no other train.

A Magnificent Display.

The thousands who are visiting this city at this time for the purpose of seeing the sights will loose a most favorable opportunity if they neglect to turn their attention to the magnificent display to be seen at W. H. Brotherton's mercantile emporium, on the corner of Whitehall and Mitchell streets. Selected with the greatest care in order to suit the demands and wants of every class of customers, there is no dry goods establishment in the city, or even in the south, which affords the public a more varied or a more complete assortment as this one. A Magnificent Display.

a more varied or a more complete assortment as this one.

In his stock are dress goods, silks and satins of every description and style; very superior articles in all wool black cashmere at prices which cannot be found elsewhere; beautiful black, colored and striped silks at fifty cents per yard, well worth the price asked; colored satins in all colors, which commend themselves for their handsome appearance, their superior quality and extreme cheapmens. Indeed Captain Brotherton has in stock dress goods in all the latest novelties at prices that are far below their market value.

The shoe department is unusually attractive. The best goods in laddes, misses and children's choes make such a display that is not surpassed by my house in the city, the prices asked are remark bly low.

shoes make such a display that is not surpassed by any house in the city, the prices asked are remark ably low.

The clothing department embraces a great variety of gents', youths' and boys' ready-made goods at prices which dely competition.

The grandest wonder to be found in this establishment, as well as anywhere else, is on the accounter. Here are tin and glassware, knives, forks, spoons, and over a thousand other articles which sell in a regular way in other houses at twenty-five cents, which are sold here at five cents. Remember, Brotherton defies competition at his place, corner of Whitehall and Mitchell streets.

In his millinery department, presided over by Mrs. B. Lyon and Mrs. M. A. Durand two skilled artists, whose repatation extends for and wide, there is the finest display of millinery goods to be found south of Baltimore. Such an opportunity is seldom offered to the ladies of the south to fit themselves up in stylish costumes as he now presents, being the sole agent for Atlanta for the celebrated Mrs. Demorest's reliable patterns, makes his establishment the headquarters for fashions.

Notice.

I have this day turned over to Mr. Clarence E. Moore for collection, all of the accounts due Lewis H. Clarke, agent for John B. Stetson & Co., and parties owing anything must make direct settlement with him. I am determined to get these accounts settled up at once, and any person owing an account can save costs of suit by calling on Mr. Moore and settling.

Very respectfully,

J. A. Christian.

For the Holidays.

For the Holidays.

The holidays, which are now so near at hand, promises to be more than usually lively. The fact that the exposition is here will more than double the sale of Christmas goods. In view of these facts Messrs, Hamilton & Hudson to whom we all look for supplies of Christmas good things, have made especially complete arrangements for supplying the demands of the trade. They are already in receipt of almost daily shipments of oranges, apples, bananas and tropical fruits in car load lots. They are at 21 East Alabama street, and are doing an immense commission business. They are particularly well prepared to supply country merchants.

By always purchasing none but the very best material, W. T. Biackwell & Co., have succeeded in building up the largest Smoking Tobacco trade in the world, as their returns to the U. S. Government show, exceeding the combined products of any ten of the largest Smoking Tobacco Factories in existence. If you desire Tobacco, delictous in flavor, saperior in quality and excelent in strength, buy only BLACKWELL'S FRAGRANT DURHAM BULL SMOKING TOBACCO. None genuine with out the bull on each package.

Were you aware that the largest smoking tobacco factory in the world is situated at Durham, North Carolina? Well, such is the fact, devoted exclusively to the manufacture of BLACKWELL'S FRAGRANT DURHAM BULL SMOKING TOBACCO AND CIGARETTES,

Capitalists who are anxious to locate manufacturing industries in the south, such as manufacturing clothing, boots and shoes, shirts and underwear, harness and saddlery, sun bonnets, of any branch of manufacturing where rapid working sewing machines are used, to call on the Wheeler & Wilson manufacturing company at their exhibit in the exposition building, or at their office at 71 Whitehall street, where these industries will be explained, and estimates given for supplying machines to be worked by steam.

An Infallible Remedy for Toothache. An Infallible Remedy for Toothache.

"Doctor, will you pull this tooth? I was advised to smoke Durham eigaretts to quiet it. I smoked all nightand my nerves are all unstrung." "What kind did you smoke?" "Here is the brand I smoked." "Well, you are in the right church, but wrong pew. Simply the word Durham will not do, as there are dozens of Durham tobaccos and eigarettes. Always look for the Bull on each package and each cigarette. They will always ease your tooth and quiet your nerves."

Joseffy's Last Concert in Atlanta
Will take place this evening at the Estey organ
rooms, corner of Broad and Alabama streets. The
Estey organ company deserve great credit for their
enterprise in securing to the musical public another
opportunity to hear-this wonderful planist before
his departure for Europe. Joseffy, with his entire
company, including Laura Bellini and Fred Dulcken, will appear in an entirely new programme. The
acoustic properties of the Estey organ rooms are soadmirable for plano recitals that the electric delicacy of Joseffy's playing can here be best enjoyed.
Go reserve your seats early if you wish to gain admittance, for only two hundred and fifty can be
seated. Joseffy's Last Concert in Atlanta

Every lady who is desirous of obtaining a handsome present for Christmas should not forget that
the Wheeler & Wilson manufacturing company give
away a sewing machine to the lucky holder of the
coupon ticket which they issue to every person who
purchases one of the patterns for sale at their exhibit in the exposition building, and at their officat 71 Whitehall street. These patterns are guaranteed to be unexcelled by any patterns in the world.
They are designed by Worth, of Paris, and are superior to all others on account of their exactness
and perfection of design. Every person who purchases a 25-cent pattern receives a coupon ticket,
which entitles the holder to one share in the drawing. The lucky holder will get the machine for 25
cents.

Mr. George W. Leonard, the courteous general agent of the Singer manufacturing company, has presented the choir of the First Methodist church with a handsome music case, for which they, with their pastor, tender their sincere thanks.

It is not rank nor state,
But git up and git
And smoke the Bull Cigarit.
That makes men great.

The weekly of this week will contain the president's message, full proceedings of the Cotton planter association, Dr. Loring's adddress, the Methodists conference appointments, proceedings of congress, and various yther interesting matter.

Had Despaired of Being Cured.

MACON, Ga., May 1881. Macon, Ga., May 1881.

Dear Sir—For several years I have been terribly afflicted with an ulcerated sore leg. For months at a time have been confined to my bed. Having tried several doctors and used every remedy I could hear of, I had despaired of ever being cured. After about seven weeks use of Sanodine, I find myself almost cured. I have thrown aside crutches and stick and feel like a new man. I cheerfully recommend it to all similarly afflicted.

There is now no excuse for using hog's lard. Refined cotton seed oil is a pure vegetable oil—wholesome and delicate. It is better for biscuit and frying purposes than laro, not scorching so easily. It is good as butter for eake. It is much cheaper. Reful price 75 cents per gallon, or 10 cents per pound. One pound goes much farther than a pound of lard. There are 75, pounds of oil in a gallon, which, at 75 cents per gallon, would be 10 cents per pound. Two-thirds of a pound of the oil is equivalent to a pound oil and. To secure a pure article buy of Hope oil mill, Memphis, branded Hope cotton butter.
